

Fourteenth update of the 2010 Helicopter Monitoring Program

Floatables:

The New York/New Jersey Harbor Complex was monitored for floatables seven times from August 28 - September 6, 2010. The Harbor was clear of significant floatables on August 28, 31, September 1- 4, and September 6. The floatable flight was not conducted on August 3 due to mechanical problem with the helicopter.

This marks the end of the 2010 Helicopter Monitoring Program.
